About Page

ABOUT ME

Hi, my name is Vicky and I am aspiring Full Stack Developer. I am currently a mother of two children (1 girl, 1 boy). Previously I have worked in a range of different environments, including running my own beauty salon and as a trained barista. Now that I have discovered Coder Academy, I have a new Zest for life and am loving coding and learning new amazing skills in the world.

[Contact Me](#)

Skill

HTML CSS SASS RUBY RUBY ON RAIL
NODE JS JAVASCRIPT

Interest

I love work out at the gym, running in the park, hiking and camping. When I have time for myself, I often just check out what is going on with my friends and family. Life is simple as it is and I just love it.

Projects Page

Band

This is my first ever website I created when I first started Coder Academy in March. I was really enjoyed playing with all the structure build in it. I was so happy and proud of what I did. Here it is. Come and have a look... ^_^

QUEEN

Zen Garden

I wasn't so sure about this project as the HTML built in for us already. It took me a long time to play around with it but i still did it. I still need to come back and finish it but i just love what i did, so I will show it out any way. ^_^

ZEN GARDEN

To be continued...

This porfolio website i made is the last project till now. Porfolio teachs me so much about HTML and CSS and it opened up a whole new world for me. It is endless amazing thing we can create with a website. I love coding and I will create much more in the future. Just wait for it...^_^

Design Decisions

Flexbox

Media Query

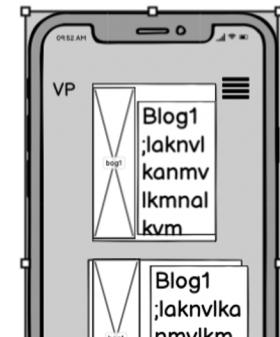

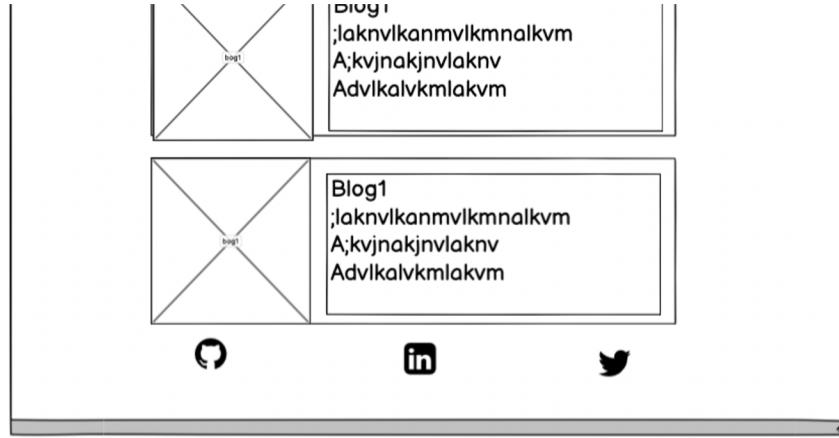

```
/* Ipad */
@media only screen and (min-width: 700px) {
  #hero {
    display: flex;
    align-items: center;
    justify-content: center;
  }
  #hero h1 {
    font-size: 20px;
    width: auto;
  }
}

/* iPhone */
@media only screen and (min-width: 300px) {
  #hero h1 {
    font-size: 15px;
  }
  #hero {
    display: flex;
    align-items: center;
    justify-content: center;
  }
  #hero .hero {
    padding: 0;
  }
}
```

Continuous Deployment

Wireframes

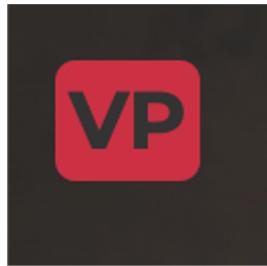

Decision process

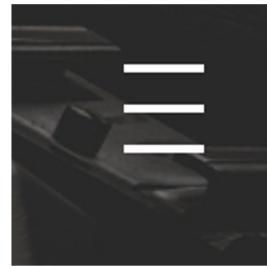

- The wireframes was made but could not be done as it is not possible to have similar feature in every singe page. As such I made the website without the wireframe atfirst.
- Ended up draw planning out a piece of paper as I go.
- Spend too much time for the home page, So I could not have time to style other page as I want to .
- Ideas came and go with leak of knowledge , also experience to make idea becomes possible. Therefore , I came up with the most basic possible page that I can do and understand.
- Lots of bugs was happening during the work but I made it happen and I was really enjoyed fixing the bugs with solution for it.

Components

Logo

Hamburger

Footer

Engagement

- Minimalist design
- Vibrant color
- Animated menu
- Gradients
- Bold icons and buttons

Challenges and Favourite

- Challenges :
 - Direction: idea, plan, reality
 - Everything are new
 - Breaking data
 - Deployment date
- Favourite:
 - Fun coding
 - New things everyday
 - Scare to sleep

Thank you
